

PRESS RELEASE // 2024-FEB

SAFRAN VECTRONIX LAUNCHES COMMERCIAL BUSINESS UNIT AND UNVEILS TWO NEW PRODUCTS

Safran Vectronix, a leader in precision electro-optical instruments, has launched its new commercial business unit, VECTRONIX SHOOTING SOLUTIONS, and unveiled two new products designed for long-range shooters and hunters.

VECTOR X: SETTING A NEW STANDARD IN RANGEFINDING BINOCULARS

Building on its legacy of equipping the world's most renowned military units, the VECTOR X, the flagship of Vectronix Shooting Solutions, sets a new benchmark in rangefinding binoculars. It is available in three models: 8×42, 10×42, and 12×42. All models feature an outstanding optical system with a robust design and two MRAD-based reticles to choose from. With an IP-67 rating and durable rubber armoring, the VECTOR X stands out as an exceptional observation tool even under tough usage conditions. With a 905nm laser and the capability to measure distances of up to 7000 yards / 6400 meters (laser class 1M) or 4400 yards / 4000 meters (laser class 1, Europe) the VECTOR X is a rangefinding binocular for the most demanding shooting scenarios.

With unrivaled usability as its guiding principle, the VECTOR X is the first commercial rangefinding binocular to incorporate intuitive D-Pad control. Whether novice or experienced users, the Human-Machine Interface (HMI) of the VECTOR X allows users to instantly grasp its operation from the moment they pick it up for the first time. This user-friendly design guarantees effortless usability, making the VECTOR X accessible to users of all proficiency levels.

Instantly after a measurement, the VECTOR X provides complete firing solutions calculated by Applied Ballistics Elite on its bright Active-Matrix OLED display, with the elevation adjustment and two windage values displayed on a single screen. Seamless integration with third-party devices and apps allows users to connect their VECTOR X to Kestrel weather meters, Garmin wrist-mounted computers, and ballistic apps.

RADICAL X: RUGGED BINOCULARS FOR SHOOTING APPLICATIONS

The RADICAL X is a rugged binocular designed for long-range shooters and hunters. With an exceptional optical and mechanical system, MRAD-based reticle, and integrated tripod mount, it is the ideal partner for all shooting-related use cases. The RADICAL X is available in two models: 8×42 and 10×42.

LOOKING AHEAD

Safran Vectronix's commitment to excellence is evident in every aspect of the VECTOR X and RADICAL X. With VECTRONIX SHOOTING SOLUTIONS, the company leverages its expertise to provide cutting-edge solutions for long-range shooting and hunting enthusiasts worldwide. Fueled by innovation and guided by customer satisfaction, VECTRONIX SHOOTING SOLUTIONS are poised to lead the way in delivering top-tier solutions for the long-range shooting and hunting community.

ABOUT SAFRAN VECTRONIX

VECTRONIX SHOOTING SOLUTIONS is a business unit of Safran Vectronix AG, a global leader in state-of-the-art electro-optical equipment, systems, and sensors for military and civilian applications. More than 100 years of Swiss tradition and excellence in optics and precision engineering are reflected in our products – handheld laser rangefinders and night vision devices, tripod-mounted orientation and positioning systems and sensor modules for our OEM partners.
